Presentation of Eurostat

Henric ANSELM
Dissemination Unit (B6) of Eurostat

EDC Brussels 4th of December 2013

Content

- ***Organisation***
- ***What is Eurostat - role***
- ***How does Eurostat work***
- ***Who uses Eurostat's statistics & User support***
- ***Website: ec.europa.eu/eurostat (web)***
- ***Latest developments & projects***

Organisation

- ***Commissioner, Mr Algirdas Semeta***
- ***Director-General, Mr Walter Radermacher***
- ***Deputy Director General, Mrs Marie Bohata***
- ***Seven Directors responsible for different sectors of Eurostat activities***
- ***800 posts***

What is Eurostat?

- ***The statistical office of the EU***
- ***not a (traditional) statistical office***
- ***Established in 1953***
- ***Since 1958 a Directorate-General (DG) of the European Commission.***
- ***The central institution of the European Statistical System (ESS)***

(a network of National Statistical Institutes - NSIs - from all EU and EEA Member States)

Role of Eurostat

"Eurostat's mission: to be the leading provider of high quality statistics on Europe"

(Statistical map of Scotland – anno 1820)

How does Eurostat work?

- ***Coordinates and harmonises statistical methodologies***
- ***Collects national data from the NSIs***
- ***Validates and aggregates data to EU level***
- ***Coordinates the preparation of European statistics and the governance structure within the ESS***
- ***Disseminates European statistics (with NSIs)***

Who uses Eurostat's statistics?

- ***Political DGs and other European Institutions***
- ***Governments, education sector, businesses, journalists and the public in general***

Free dissemination

- ***Recognition that statistics are a public good***
- ***Free dissemination started 1 October 2004:***
 - ***Single exception is micro data access for researchers***
 - ***Impartial access for all users***
 - ***All statistical domains***
 - ***Over 4500 datasets***
 - ***All publications on website***

Country profiles - App for Android

The screenshot shows the Google Play Store interface. At the top, there is a navigation bar with links for '+You', 'Search', 'Images', 'Maps', 'Play', 'YouTube', 'News', 'Gmail', and 'More'. On the right side of the navigation bar, there are links for 'Sign in' and a settings gear icon. Below the navigation bar, there is a banner for 'Introducing Google Play' with a 'LEARN MORE' link. The main header features the Google Play logo, a search bar, and a search button. Below the header, there are two tabs: 'SHOP ANDROID APPS' and 'MY ANDROID APPS'. The 'SHOP ANDROID APPS' tab is active, and it displays a green banner for 'Apps by Eurostat'. Below this banner, the 'Eurostat Country Profiles' app is listed. The app listing includes the Eurostat logo, the app title 'Eurostat Country Profiles', the developer name 'EUROSTAT', a description 'The Eurostat Country Profiles application gives mobile access to the main sta...', a rating of five stars, and an 'INSTALL' button. A red circle highlights the app title and description area. At the bottom of the page, there is a footer with links for 'My Orders & Devices', a language dropdown menu set to 'English', and a 'Help' link. The footer also contains copyright information: '©2012 Google' and links for 'Site Terms of Service', 'Privacy Policy', and 'Developers'.

Welcome to Statistics Explained

Statistics Explained, your guide to European statistics.

Statistics Explained is an official Eurostat website presenting all statistical topics in an easily understandable way. Together, the articles make up everyone's **encyclopedia** of European statistics, completed by a **statistical glossary** clarifying all terms used and by numerous links to further information and the very latest data and metadata, a **portal** for occasional and regular users alike.

To find the information you need, use the hierarchical theme tree, the categories or the search function (alt-f).

New

New: Housing price statistics - house price index

This article describes the house price index (HPI) in the euro area and the European Union (EU), presenting data on this indicator both at European and Member State level. It also provides examples of possible use of this indicator in relation to other statistics, such as consumer price indices, rent price indices and household disposable income. Finally, a summary description of the methodology used in the compilation of the HPI is given.

The HPI shows the price changes of residential properties purchased by households (flats, detached houses, terraced houses, etc.), both newly-built and existing ones, independently of their final use and independently of their previous owners. The Member States' HPIs are compiled by the national statistical institutes, while Eurostat calculates the euro area and EU HPIs.

More ...

Updated: Tourism statistics - occupancy rates in hotels and similar establishments

This article focuses on the short-term evolutions in the occupancy of bedrooms and bed places of hotels and similar accommodation establishments in the European Union (EU).

With the adoption of Regulation 692/2011 concerning European statistics on tourism, information on occupancy of hotels and similar establishments has significantly improved. From 2012 onwards, Member States transmit to Eurostat monthly data on net occupancy rate of bedrooms. This is a new variable complementing already existing information on net occupancy rate of bed places.

This article is the first publication of October 2012 data on occupancy rates of bedrooms and bed places. More ...

Updated: Minimum wage statistics

This article illustrates how minimum wage levels – established by national legislation or directly by national intersectoral agreement – vary considerably among European Union (EU) Member States and within the euro area; it also provides a comparison with the situation in Croatia, Turkey and the United States.

Minimum wage statistics published by Eurostat refer to monthly national minimum wages. The national minimum wage usually applies to all employees, or at least to a large majority of employees in the country. Minimum wages are gross amounts, that is, before deduction of income tax and social security contributions. Such deductions vary from country to country. The national minimum wage is enforced by law, often after consultation with the social partners, or directly by national intersectoral agreement. More ...

Updated: Tourism statistics - nights spent in tourist accommodation establishments

This article focuses on the short-term evolutions in the nights spent in tourist accommodation establishments in the European Union (EU). The data for the most recent reference month available are compared with the same month of the previous year, in addition, and to smoothen fluctuations, data from January to the most recent available month are

Today's article

Population projections

This article looks at Eurostat's latest population projection scenario (Europop2010) for the 27 Member States of the European Union (EU) and the EFTA countries. It focuses more particularly on population ageing, undoubtedly a key demographic challenge in many European countries over the next fifty years. Its implications for socioeconomic systems, such as public pensions programmes, health care or kinship structures, may be considerable.

Population projections are what-if scenarios that aim to provide information about the likely future size and structure of the population. The European Commission uses the results to analyse the impact of ageing populations on public spending.

Main statistical findings

Highlights

The greying of the baby boomers - A century-long view of ageing in European populations

In the second half of the 20th century, the progressive decline to low levels of fertility and lower mortality rates among the elderly resulted in population ageing in Europe. Positive or negative net migration flows tended to attenuate or intensify countries' ageing processes. In particular, in the post-World War II period, fertility increased and subsequently declined in several countries: this demographic event, labelled as the 'baby boom', has been a further factor in the population ageing process of the 21st century.

Population ageing from 1960 (taken as the representative year of the baby boom) to 2060 (the year by which most of the baby boomers will have died out, is here measured by four commonly used indicators: the median age, the proportion of persons aged 65 and over, the proportion of persons aged 80 and over (the 'oldest-old') and the old-age dependency ratio. This analysis merges estimated values from 1960 to 2010 with projected values from 2011 to 2060, taken from the Eurostat Population Projections 2010-based (Europop2010); these latter figures should not be considered as forecasts, but just as one of the possible future demographic developments. 2010 is therefore taken as the pivotal year from which we can look half a century backwards or forwards.
